ConfluenceTM

Seamless Abutment
Technology

Love the space you're in.

Seamless Abutment Technology from Komfort is a new patented solution for gypsum wall endings.

Confluence™

The Confluence system allows you to create seamless joints between wall endings and the gypsum boards.

The Confluence range of seamless abutments provides a crisp interface between gypsum and glass walls. Using the patented profile eliminates the need for complicated and visually intrusive detailing, creating the perfect finish.

Confluence abutments are a multitude of sections to fit 75, 100 and 125mm wall thicknesses. The versatility is best demonstrated by the universal mid wall pocket that suits both ceilings and partitions.

Standard parts were used to achieve the clean and crisp look.

Confluence provides a seamless monolithic interface between glass and drywall partitions through pre-cast patented solid plaster components

Technical spec at a glance

DIMENSIONS:
Up to 3000mm high

FIRE RATINGS:
Up to 30/30

ACOUSTICS:
Up to 46dB (Rw)

STRUCTURE:
Contact our technical department

DEFLECTION HEAD (+/-):
N/A

WEIGHT Per m² (kg):
Solid up to 38.21
Glazed up to 55.33 (double glazed)

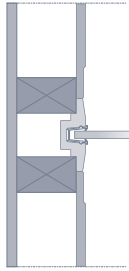

BLINDS:
Yes - within double glazing.

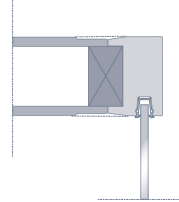

MANIFESTATION:
Yes

EXAMPLES of Confluence seamless abutment profiles in use

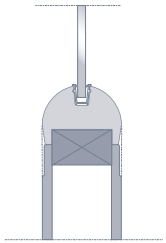

To see examples of how abutments from our standard range are being used view the diagrams below

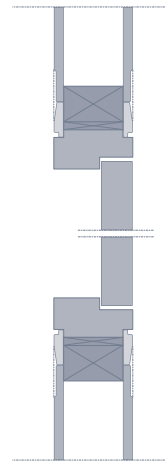

SA-1
For installing frameless glass mid wall or into a ceiling. At the lower end, the abutment is adapted for meeting SA-14 skirting.

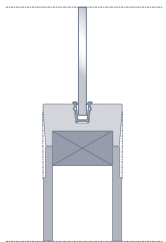

SA-5
A square post end with perpendicular glazing pocket to create a linear frameless interface between wall and glass at a corner joint. At the lower end, the abutment is adapted for meeting SA-14 skirting.

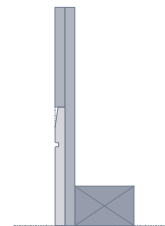

SA-2
A rounded end post with glazing pocket, used for making a frameless interface between wall and glass. At the lower end, the abutment is adapted for meeting SA-14 skirting.

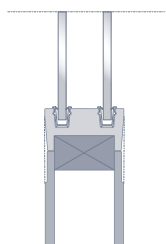

SA-13
To create a flush wall joint with the doorframe.

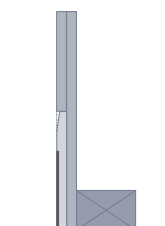

SA-3
A square end post with glazing pocket, used for making a linear frameless interface between wall and glass. At the lower end, the abutment is adapted for meeting SA-14 skirting.

SA-14
To create a skirting seamlessly joined with gypsum boards. Designed with a 5 x 5mm recessed 'shadow' detail.

SA-4
A square end post with a double glazing pocket, used for making a linear frameless interface between wall and a double layer of glass. At the lower end, the abutment is adapted for meeting SA-14 skirting.

SA-15
A skirting with a 3mm rebate to accommodate a decorative section to sit flush with the wall.
